> M.Sc. student in Electromobility at the University of Stuttgart. Currently a working student in development tooling at Mercedes-Benz.

WORK

Jul 2026 – present

Working student • Development tools · Mercedes-Benz, Sindelfingen

- Implemented **structured logging** for AI-assisted development tools and validated it in the development environment.
- Added missing **frontend component tests**, improved coverage reporting and verified **CI checks**.

Jan 2024 – May 2024

Internship • Radar signal processing · Fusionride Technology Co., Ltd., Shanghai

- Developed and maintained a Python-based **radar data visualization tool**.
- Implemented **data processing, plots and UI interactions**; improved rendering.

EDUCATION

Oct 2024 – expected Sep 2027

Master of Science • ongoing, Electromobility · University of Stuttgart
Focus areas: Autonomous and connected driving

Sep 2020 – Jun 2024

Bachelor of Science, Vehicle Engineering · University of Shanghai for Science and Technology

PRODUCTS & RESEARCH

Jul 2026 – present

Personal project • CareerAgent
AI-assisted career planning for engineering students.

Oct 2025 – Mar 2026

Research project • LLM Hallucination Detection
Literature review and design of an approach to prevent hallucinations in large language models.
Grade 1.7 (German scale) • Evaluation on 200 test samples

Apr 2025 – Jul 2025

ROS2 Lab • Robot System with SLAM, Object Detection and Manipulation
My contribution: object detection and camera–LiDAR localization.

Dec 2023 – Apr 2024

Bachelor's thesis • Pedestrian Crossing Intention Prediction for Autonomous Driving Scenarios
Video-based classification of pedestrian crossing behavior.

SKILLS

Engineering	Python, JavaScript, Software testing, TypeScript, Lit Web Components
Data & analytics	SQLite, Data processing and visualization
AI & LLM agents	Ollama, LLM evaluation, YOLOv8, OpenCV, PyTorch, AlphaPose
Tools	CI/CD, Git, Vitest, Azure
Automation	Camera–LiDAR fusion, ROS2

LANGUAGES

Chinese (Native) · German (B2–C1) · English (C1)
